

# FOOD SERVICE CATALOG

# Why Eco Guardian?

Our philosophy is *pure products for a clean future*. Eco Guardian provides ecologically responsible products for everyday use. We're committed to protecting the environment by offering products that are organic or eco-friendly in nature — significantly reducing the waste and growing disposal concerns caused by traditional polystyrene foam and plastic food service items.

Our compostable food packaging products are made from rapidly renewable plant fibers — sugarcane, bamboo, or wheat straw. Our wide range of sturdy tableware is proven fridge, freezer, microwave, and oven safe.

Even Eco Guardian cutlery is made from renewable resources. Composed of potato and corn starch, our knives, forks, and spoons are the perfect replacement for traditional plastic cutlery.

## Third-Party Certified

Eco Guardian compostable tableware products are BPI Certified (Biodegradable Products Institute) as compostable in industrial facilities according to ASTM D6400 and/or D6868, and they have written approval for use as food packaging by the U.S. Food and Drug Administration and by Canadian agencies for Health and Food Safety.

Our factories are highly regulated and certified under ISO 9001:2008, 22000:2005, 14001:2004, and meet all the requirements of HACCP, SA8000, EN 13432, and the BRC Global Standards.

In addition, all Eco Guardian products go through UV sterilization to ensure the highest levels of food safety, and we employ current industry standard AQL procedures to create only the finest products.

**COMPOSTABLE**  
IN INDUSTRIAL FACILITIES

Check locally, as these do not exist in many communities. **Not suitable for backyard composting.** CERT # 3105600

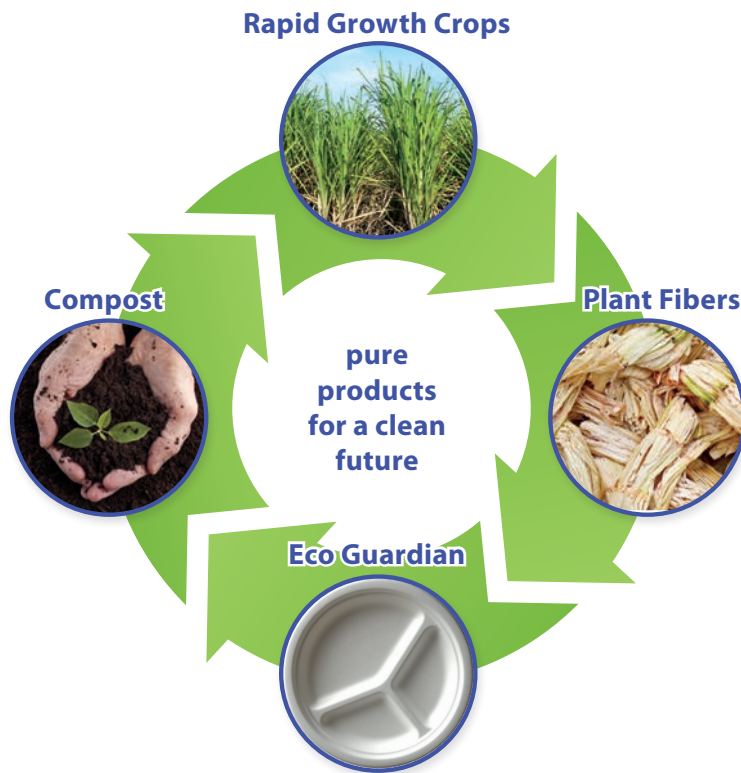

## What Does 'Compostable' Really Mean?

*Compostable* means a product will break down into water, carbon dioxide, and biomass, with NO residual toxins. This material is rich in nutrients and can be used to fertilize soil. In order to officially label a product 'compostable', there are strict testing criteria as defined by the **American Society for Testing and Materials (ASTM)** that have to be met. The **Biodegradable Products Institute (BPI)** verifies the testing before issuing an official Compostable Certification.

## What is Your Tableware Made From?

In the case of sugarcane, the stalks are shredded and rolled to extract their juice at a sugar mill. For wheat, we use the stalks leftover from harvesting grain. These left-over fibers were once considered a manufacturing by-product and discarded or burned. Now this material is cleaned, washed, pulped, and compressed for use in the production of compostable tableware. Unlike trees that take decades of growth before harvest, these are annual crops and are considered rapidly renewable, sustainable, and eco-friendly resources.

## A Renewable & Sustainable Cycle

Eco Guardian offers a wide range of compostable items such as plates, bowls, clamshells, cups, and unique trays for food service, retail, and many other applications.

Our vast range of in-stock products combined with our in-house custom design and print capabilities makes us your best choice for Eco-friendly packaging. We are committed to your satisfaction and to building quality relationships.

## Features and Benefits

- ✔ Compostable (3rd-party certified)
  - Compost with organic waste\*
- ✔ Fridge, freezer, microwave, and oven safe
  - Temps from -40° F to 450° F (-4° C to 232° C)
- ✔ Chemical-free and food safe
- ✔ Made from rapidly renewable resources
- ✔ Environmentally friendly product
- ✔ Superior strength & stability
- ✔ Great for hot and cold foods
- ✔ Film sealable & MAP compatible

*\* check with your local facilities*

## Custom Printing & Embossing

- ✔ Custom branding on cups, bowls, & retail packs
- ✔ High-quality printing & embossing
- ✔ Low minimums

## Customized Shapes

- ✔ Create innovative packaging solutions for your products
- ✔ Any size, any shape - white or natural
- ✔ Prototyping available, exacting standards

## Custom Packaging Design

- innovative packaging solutions
- functional prototypes
- exacting standards

Eco Guardian can help you find your competitive advantage. Let us custom design a unique packaging solution that delivers all the features and benefits required for your specific needs. We'll help you every step of the way — from concept, through prototyping and testing, to final production — professionally and economically.

## Custom Branding – Printing and Embossing

- high-quality printing & embossing
- cost-effective
- low minimums

Custom printing and embossing is a great way for you to promote your business, brand, or special event while significantly reducing waste and the growing disposal concerns caused by traditional polystyrene foam and plastic packaging.

**FREE Custom Printing**
